

Commercial Development Projects

Cuoco & Cormier Engineering Associates, Inc. has prepared site designs for a number of commercial projects. The following offers a sampling of the types of projects we have recently developed:

Oracle Corporation Nashua, New Hampshire

C&C prepared a comprehensive site design and permitting package for an approximately 100,000 sq. ft. office campus. The project included the design of a sewer lift station to connect the site to the municipal sanitary system as well as the layout for the access road to the development.

DJ Reardon Company – Tewksbury, Massachusetts

C&C developed a comprehensive site plan for an approximately 85,000 sq. ft. combination cold storage and beverage distribution warehouse. The building has a drive through traffic pattern to enhance the shipment and distribution of product.

Daniel Webster Plaza – Nashua, New Hampshire

C&C created a complete site layout and utility design for an approximately 100,000 sq. ft. multi-tenant shopping plaza located along Daniel Webster Highway in Nashua. The project included the development of a storm water treatment system, lot consolidation, and state and local permit approval.
