

GREENWOOD MEADOWS

Andover, Massachusetts

Greenwood Meadows is a twenty lot single family residential subdivision that Cuoco & Cormier Engineering Associates designed for Hearthstone Realty in Andover, Massachusetts. The project was designed to maximize the potential build out of the site while also allowing the final development to blend into the existing character of this part of Andover.

In addition to site design, Cuoco & Cormier also supported Hearthstone Realty's marketing efforts by developing several graphic designs of the subdivision which were posted on the Internet. These interactive designs allowed perspective buyers to research available lots, review potential housing styles and lot configurations. This approach significantly aided Hearthstone Realty in the marketing and sales of the homes.
